

Why attend?

INDG 436 was released by the HSE in October 2011 when PM5 and 36* ZHUH RI¿FLDOO\ ZLWKGUDZQ ,W LV QR... Engineering Insurance Companies are looking to see if companies are complying with the guidance given in BG01, as this guidance is now seen as ³ , Q G X V W U L D O % H V W 3 U D F W L F H ´

BG01 was written to explain the roles and responsibilities when owning, operating or managing hot water and steam boiler plant. To date over 800 people have attended the BG01 conferences across the UK and as part of th H G H O H J D W H I H G E D F N D V L J Q L ¿ F D Q W S U R S F... help with carrying out a Technical Boilerhouse Risk Assessment.

In response, CEA has organised risk assessment conference workshops with more practical hands-on training as part of the two days which is extremely valuable.

CEA have redesigned the conference workshop into a two-day event that will provide all of the necessary information regarding INDG 436 and BG01. The second day will primarily be dedicated to a practical workshop. The delegates will work through some risk assessment scenarios and discuss these with other attendees. Mentors will be on-hand to work with each group and help steer you through the examples.

Several CEA member companies are also available to work with you at your site, working alongside some of your company staff who know your plant and to create your own risk assessments.

Who should attend?

All Managers and Engineers responsible for the operation and selection of boiler plant and ancillaries especially those in the following sectors:
